WINTER 1976

The Foster Namias Building Fund: A Progress Report

The Foster Namias Building Fund, which got underway rather quietly early in July and had its official birth at a kick-off dinner in October (see picture story in center spread) reports good progress.

The campaign's goal is to raise \$300,000 by June 30, 1978, or \$100,000 a year for the next three years. To date, 66 donors have contributed just over \$55,000 in gifts and pledges. Revenue has come mainly from MCO alumni, but there have been several sizable corporate gifts. Pledges are coming in steadily at the rate of about a half-dozen each week, for a weekly average of from \$1,500 to \$3,500.

Several names have been added to the list of campaign workers. Recently, the following alumni have not only made their own pledges but volunteered to solicit some of their fellow alumni: Emmanuel Glasser, O.D., Baltimore, Maryland ('48); Melvin Dunbar, O.D., Lebanon, New Hampshire ('31); Joseph V. Medeiros, O.D., Fall River, Massachusetts ('53); and Charles S. Bloom, O.D., Madison,

New Jersey ('43). The efforts of these volunteers are greatly appreciated, and still more volunteers are needed.

Samuel Wasserman, O.D., ('42) is in charge of a new campaign activity about which you will be hearing more. Plastic "mini-banks" are being distributed to alumni (some of you may already have received yours) in order to broaden the campaign's base to include the general public. You will be asked to display the bank as prominently as possible on your dispensing table and put a dollar's worth of change in it as seed money. Then, when you make adjustments or minor repairs for which there is normally no charge, ask the patient if he or she would contribute to optometric education by placing a donation in the mini-bank. If your assistants handle adjustments, urge them to see that the banks are used. This program will cost you exactly \$1 and will help to raise the consciousness of the general public that good eye care ought not to be taken for granted.

Every three months you will receive a reminder to remove the donations from the bank and write a check to the Foster Namias Building Fund for that amount. Patients who wish to write checks so that they may use the canceled check as evidence of a tax-deductible contribution, should also make them payable to the Foster Namias Building Fund. You are encouraged to mail these checks to the Fund immediately so as not to inconvenience your patient.

Another optometry school engaged in a similar project realizes annual collections of more than \$10,000. The secret, of course, is to use the banks. Those which are prominently displayed and brought to the attention of the patient can easily collect \$20 to \$30 a month.

If you haven't received a bank yet and would like to participate in the project, please get in touch with Dr. Wasserman or Joe Jefferson.

And if you haven't yet bought your "share of the bear," the stock is still on the market and still the best to be had. Remember, your gift is tax deductible.

Hasty Pudding Dishes Up Second Helpings

At last year's NECO Congress, some 300 optometrists and their guests enjoyed a hilarious evening at the famous Hasty Pudding Club in Cambridge.

The theater party was such a success (the tickets went very quickly, and many who wanted to come were unable to) that it is being repeated again this year. The production this year will be *Tots in Tinseltown*, a musical satire about Broadway in the '30s. The event is being sponsored by the Women's

continued on next page

It Was Istanbul, Now it's Constantinople

We all remember when refrigerators were called ice boxes and, of course, when glasses were spectacles. Mohammed Ali spent years persuading the world not to call him Cassius Clay. Exxon spent a fortune trying to help us forget Esso (though we won the battle over the tiger). We all got used to calling the Brooklyn Dodgers the Los Angeles Dodgers; and we finally decided that if we owed our fealty to the Boston Patriots, we owed it to the New England Patriots too. Phil Esposito had to adjust

to wearing a New York Rangers uniform after years of sporting Boston Bruin threads, and Jean Ratelle, in turn, was able to cope with his switch from the Rangers to the Bruins. And Cary Grant was once Archie Leach, in case you forgot.

Nothing stays the same forever. Come July 1, the Massachusetts College of Optometry will be no more. In its place will be "The New England College of Optometry." A time for both nostalgia and pride. We'll adjust.

Auxiliary to the Massachusetts Society of Optometrists and the MCO Alumni Association and will benefit the Foster Namias Building Fund. Curtain time is 8 p.m., Saturday, March 13. Tickets will be \$12.50 each, or \$25 per couple.

Once again, a champagne party will follow the show; and there will be a cash bar before the show, during intermission, and after the show.

Bus transportation to the Hasty Pudding Club (12 Holyoke Street, Cambridge) will be provided. A charter bus will leave the Sheraton-Boston at 7 p.m. and return at 11 and 12 p.m. Roundtrip fare will be \$1.50 per person.

A printed memento of the 1976 Hasty Pudding extravaganza will feature the names of all sponsors of the evening — those who have donated \$50 to the event. Sponsors will, of course, also receive free tickets.

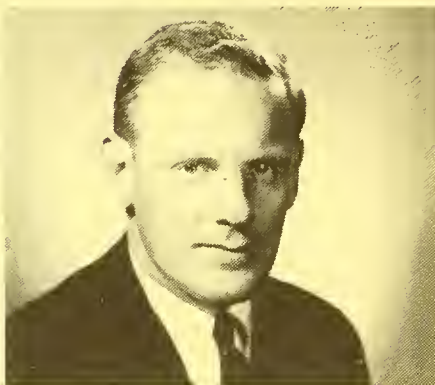

For those of you who are unfamiliar with Hasty Pudding, the theatrical organization was established 130 years ago and is America's longest running theatre. Each year 75 Harvard and Radcliffe students produce and perform an original play. Tradition requires that all parts be played by Harvard men. Over the years the Pudding has been graced by such performers as William Randolph Hearst, J. P. Morgan, Oliver Wendell Holmes, Alan J. Lerner, and Jack Lemmon. The show runs nightly for four weeks in Cambridge, opening February 26, and then embarks on a ten-day tour to New York City, Washington, D. C., and Hamilton, Bermuda. Last year the show played to standing-room-only crowds in every city.

If you haven't reserved your seats yet, be sure to contact Mrs. Florence Blanchard, president, Massachusetts Society of Optometrists Auxiliary, c/o Massachusetts College of Optometry, 424 Beacon Street, Boston, Massachusetts 02115.

NEBHE Honors Saval

Maurice H. Saval, president of the American Universal Insurance Company and an MCO board member, was honored by the New England Board of Higher Education recently. The highlight of NEBHE's 20th anniversary meeting was the presentation of a Certificate of Appreciation to Mr. Saval, who has been active on the NEBHE board since 1964.

Two New Board Members Elected

Richard D. Driscoll

The Board of Trustees has elected two new members: Richard D. Driscoll, senior vice president of New England Merchants National Bank, and George D. Noble, Jr., assistant vice president of New England Telephone.

Mr. Driscoll holds an A.B. from Boston College and an M.B.A. from Harvard. He is an executive committee member of the American Bankers Association Bank Card Division; treasurer and director of the Holyhood Cemetary Association; member, Governmental Relations Division Committee, Massachusetts Bankers Association; director, Merrimack Paving Corporation; member, Robert Morris Associates; director, New England Bankcard Association; and director, Professional Operating Management Group, Inc.

His civic and charitable affiliations include serving as director of the Greater Boston Chapter of the American National Red Cross; treasurer and member of the Trustee Council, Boston University Medical Center; trustee, Emmanuel College; director, Family Counseling and Guidance Centers, Inc.; director,

George D. Noble

Greater Boston Young Men's Christian Association; director, Morgan Memorial, Inc.; and trustee, Saint John of God Hospital.

Mr. Noble was general manager of New England Telephone's Rhode Island operations from 1962 to 1965, when he was named an assistant vice president. He was with American Telephone & Telegraph Co. in New York from 1953 to 1955 and with Michigan Bell Telephone Company from 1950 to 1953.

He attended the University of Detroit and the University of Oregon.

He is a director of Colony, Inc., Quincy, Mass.; Jamaica Plain Cooperative Bank; and the Public Affairs Council, Washington, D. C. He is a trustee of Bethany Hill School, Framingham, Mass., and a member of the Boston Chamber of Commerce's State Affairs Committee, Navy League, Catholic Alumni Society, Gridiron Club, World Trade Club, USO Council of New England, Suffolk University's Business School Advisory Council, Massachusetts Dental Service Corporation, and the Faulkner Health Care Corporation.

Israel and Sylvia Grossman Scholarship Established

Mr. and Mrs. Israel Grossman recently received an unusual 40th Anniversary present which benefited MCO and future optometric students as well. The Grossman's sons (Alan L., '68, and E. Robert, '64), their wives, and their daughter and her husband (Mr. and Mrs. Bernard Bloom) established The Israel and Sylvia Grossman Scholarship Fund to honor the Grossmans and to reward future scholars.

All registered MCO students will be eligible for Grossman Scholarship awards as long as they are in

good standing and making normal progress toward the O.D. degree. The agreement setting up the fund states that the scholarship will be awarded to "students who have demonstrated academic ability and the potential of becoming able, concerned members of the alumni body of the College and the optometric profession."

Drs. Alan and Robert Grossman seeded the fund initially, and to date eighteen donors have contributed to it.

The scholarships will first be awarded in the 1976-77 year.

VA Residency Funded

In a private ceremony in Dr. Baldwin's office recently, Dr. Samuel W. Schlosberg, chief of optometry at the Boston Veterans Administration Outpatient Clinic, accepted an appointment as associate clinical professor at MCO. Attending the presentation were Dr. Kenneth Myers, director of optometry, VA Central Office in Washington; Dr. John H. Carter, MCO academic dean; and Dr. Charles F. Mullen, special assistant to the president at MCO. (Pictured above, l. to r.: Dr. Baldwin, Dr. Carter, Dr. Schlosberg, Dr. Myers, and Dr. Mullen.) Dr. John S. Thornton, chief of ophthalmology at the Outpatient Clinic, also was named to an MCO associate clinical professorship, but was unable to attend the October 20 ceremony.

MCO and the VA Outpatient Clinic recently announced the establishment of a joint one-year residency training program, with emphasis on rehabilitative optometry.

The residency, funded by a \$46,156 award from the Academic Affairs Division of the VA, is only the second residency in rehabilitative optometry in the entire VA system. Applications are currently being accepted, and a resident is expected to be named in the near future.

The residency will offer a unique opportunity for the clinical practice of optometry in an interdisciplinary environment. The resident will work closely with Drs. Schlosberg and Thornton and other MCO faculty to learn those special opto-

metric skills required in treatment of the visually impaired.

Primary training areas will include the recognition and optometric treatment of vision problems secondary to aging, disease, or trauma, with particular emphasis on cooperative ophthalmologic-optometric treatment regimens.

Remodeled space and new equipment have been provided by the VA to enable the resident to examine patients at the VA's large downtown Outpatient Clinic. Rotations of up to ten hours per week also will be arranged to allow additional training at other VA clinics, MCO, or attendance at hospital case conferences, etc. In addition, the resident will be expected to devote two or three hours per week learning clinical teaching techniques.

Three Screenings Held

MCO students recently participated in three well attended community screenings.

More than 200 Norwood residents were screened during a glaucoma clinic sponsored by the Norwood Lions Club. The clinic was under the supervision of Dr. Thomas A. Couch, a 1955 graduate of MCO and Norwood Lions Club Sight Conservation Chairman. Students Fred Valentine, Janet Wosk, and David Soll assisted. The American Optical Company supplied the non-contact tonometers used in the testing.

Dr. Paul Montminy ('65) arranged for and supervised a screening clinic at the Oakdale Mall in Tewksbury November 8. Student participants were Steven Bennett, Steven Byrnes, Barbara Caffrey, and Paulette Turco. The equipment was loaned by MCO's General Clinic. Approximately 110 persons were screened.

Dr. Montminy also supervised a pre-school vision screening clinic for some 225 Tewksbury children September 6. The clinic, held at Tewksbury Junior High School, was sponsored by the local Lions Club. The General Clinic donated the necessary equipment, and students Floyd Hooker and Dennis Karambelas assisted in the screening.

Faculty News

John E. Asarkof, O.D., associate clinical professor, discussed the services available at the College's Low Vision Clinic at the October meeting of the Everett Lions Club. About forty members were in attendance.

Gerald R. Friedman, O.D., assistant professor of rehabilitative optometry and acting coordinator of the rehabilitative optometry tract, spoke on "Management of the Low Vision Patient" before a group of optometrists from the Marlborough, Massachusetts, area, on November 12.

Mr. Robert Morgan, general director of the Dimock Community Health Center and guest lecturer at MCO, was recently named to the Vision Care Committee of the Medical Care Section of the American Public Health Association. At his first APHA annual meeting — held in Chicago, November 17-20 — Mr. Morgan was elected co-chairperson of the Vision Care Committee.

Charles Mullen, O.D., special assistant to the president and associate clinical professor, delivered an invited lecture at the International Congress of Optometry in Paris November 5.

The Congress, sponsored by the Societe d'Optometrie d'Europe, was held at the Hotel Sheraton in Paris. About 1,000 optometrists from nine European countries attended. Invited lecturers were from Europe, Canada, and the United States. Lectures were simultaneously translated and retransmitted in French, Dutch, German, English, Spanish, and Italian.

Dr. Mullen spoke on "Slit-Lamp Diagnosis of Common Anterior Segment Disorders."

Dr. Mullen also spoke on "Regionalization and MCO's Participation in Community Health" at a meeting of the Middlesex District of the Massachusetts Society of Optometrists on December 1. Several Massachusetts state legislators attended that meeting.

And on November 12 Dr. Mullen discussed "MCO's Clinical Education Program" before a group of optometrists from the Marlborough, Massachusetts, area.

continued on next page

Jeffrey and Neal Nyman, O.D., (both '72) were recently elected Fellows of the American Academy of Optometry. Dr. Jeffrey Nyman is director of the eye clinic at the South End Community Health Center, and Dr. Neal Nyman directs the eye clinic at the Dorchester House Multi-Service Center. Both are clinical instructors at MCO.

Abe L. Pogoda, O.D., assistant professor of environmental vision and optometry and coordinator of the environmental vision tract, and Jerome Rosner, O.D., professor of optometry, coordinator of the pediatric optometry tract, and director of specialty clinics, participated in a morning-long symposium on "Screening and Diagnosing Driver Vision Problems" at the December 15 meeting of the American Academy of Optometry in Columbus, Ohio. Dr. Pogoda introduced the symposium and also delivered an address on "Diagnostic and Remedial Procedures for Clinical Implications of Referrals of Driver Vision Testing Failures." Both participated in a panel discussion on "The Role of the Vision Care Specialist in the Diagnosis and Remediation of Driver Visual Deficiencies."

Sidney Wittenberg, O.D., associate professor of optometry, director of continuing education, and director of applied research laboratories, is one of five optometric professionals from around the country who served as a consultant in the preparation of a recent publication, "Occupational Brief for Optometrists." The report was published by Chronicle Guidance Publications, Inc., of Moravia, New York, a career guidance service.

The second editions of two books by Theodore P. Zacharia, O.D., Ph.D. — who was named assistant professor of physiology and pharmacology at MCO effective September 1 — are currently in print: *The Immune Response at the Cellular Level* (Marcel Dekker, New York, 1973) and *Immunopathology: Methods and Techniques* (Marcel Dekker, New York, 1974).

Dr. Zacharia also has been named the representative of the Optometry Journals to the Council of Biological Editors meeting to be held in New Orleans in April. He was managing editor of the *Proceedings of the National Academy of Sciences* from 1971 to 1973.

Dr. Zacharia's research interests are in public health, medical microbiology and parasitology, virology, immunology, and oncology. He was recently appointed chairman of the College's Committee on Research.

A 1975 graduate of MCO's two-year O.D. program, he holds a Ph.D. in immunology from the Lobund Institute of the University of Notre Dame and has done post-doctoral work at Rockefeller University.

College Gets Beta Sigma Kappa Chapter

A chapter of Beta Sigma Kappa, international honor fraternity for students of optometry, has been formed at MCO and thirteen students have been elected charter members.

The installation banquet, held Wednesday, September 17, at the Harvard Club, featured Dr. Richard E. Dugan, national chancellor of Beta Sigma Kappa, as guest speaker.

The students were chosen on the basis of their academic records and

by recommendation of the faculty.

Shown in the picture are, left to right, Dr. Baldwin, Bruce Goldin, Paulette Turco, Caroline Marten-Ellis, Philip Savage, Renalee Selvin, Stephen Byrnes, Dr. Dugan, Ronald Cedrone, Donald Siwoff, Dennis Cantwell, Terry B. Goodman, Lee De Rosa, and Dr. Paul Pease, faculty adviser to the chapter. Not shown are charter members Barbara Caffery and Jerry W. Ferrell.

Students to Host Convention

MCO students will play host to the sixth annual convention of the American Optometric Student Association, which will be held January 22-25 at the Parker House Hotel in Boston.

AOSA membership consists of approximately 3,300 students enrolled in the nation's twelve colleges of optometry, as well as affiliate members from two Canadian institutions and associate members from among the practicing optometric community. Students enrolled in two-year optometric technician programs, such as the one jointly administered by MCO and Fisher Junior College, also are eligible for affiliate membership.

About 600 students are expected to attend the convention.

The four-day convention schedule will include a lecture series; about 45 exhibits of optical equipment; election of new officers; and an officer installation banquet Saturday evening, January 24.

Practicing optometrists are invited and encouraged to attend the equipment exhibit — which will remain open each evening until 9 o'clock in order to accommodate them — and the lectures.

Student Wins Nikon Award

Rita Morrison, a second-year student with a 4.0 academic average, placed second in the 1975 Nikon Scholar Awards Competition. Her prize, a Nikon ocular vertexometer, was presented to her by James Vilardi, a representative of Nikon, Inc., at the October 22 kick-off dinner for the Foster Namias Building Fund.

Representatives from all optometric schools in the country participated in the competition, sponsored each year by the ophthalmic division of Nikon, Inc.

In the picture above, Dr. Hyman Kamens, dean of administration and Ms. Morrison's sponsor in the competition, looks on proudly.

The Optometric Preceptorship Program: Milledgeville

Over the past several years, MCO's optometric preceptorship program has grown into one of the most extensive and sophisticated in the country. Students now train at five clinics administered directly by MCO as well as at seventeen affiliated institutions. Beginning with this edition of the Newsletter, we will explore some of the clinic rotations which comprise such an important part of the experience of today's optometric student.

Kenneth D. Common, a fourth-year student, spent the summer at Central State Hospital in Milledgeville, Georgia. What follows is his account of the experience.

I have spent most mornings here working with mentally retarded patients whose I.Q.'s are as low as 20. I usually examine five patients in an eye clinic in the building where the patients are residents. It is often possible to obtain visual acuity levels using a modified chart with three symbols: X, O, and Δ. The patient observes the chart, and then, as the examiner points to one of the symbols, the patient points to the corresponding symbol on a board in his or her lap. This is not as easy as it sounds, and often the patient is either uncooperative or does not understand.

Other tests which sometimes yield results are the cover test, near point of convergence, pupillary reflexes, interpupillary distance, Worth 4 dot test, ophthalmometry, stereopsis (using the Titmus stereo fly), and color vision (using HRR pseudo-isochromatic plates, again with the symbols X, O, and Δ). These preliminary tests are attempted, after which a 1% cyclogyl solution is instilled. The next patient is then brought in for preliminary tests. By the time all five patients are seen, the cycloplegic has had time to work and the first patient is brought back into the examining room for retinoscopy and ophthalmoscopy. The retinoscopy is performed with trial lenses, more often than not hand held. Not all of the above tests are performed on every patient, and the examiner must judge when it is useless to pursue a given test. Patience is a real virtue in a situation such as this since one cannot be sure what kind of behavior the patient will exhibit; reactions range from complete cooperation to violence. There are always attendants from the ward present if assistance is required.

To elicit better cooperation from patients, small incentives such as gum, candy, cigarettes, or snuff can

be offered. The change in response is often dramatic. The most difficult thing to control is fixation. We control accommodation by doing a cycloplegic examination, but we cannot control where a patient looks, or if he keeps his eyes open, except by showing him an interesting or desirable object. One has not truly experienced optometry to its fullest until he uses a can of snuff for a fixation target while performing the cover test. I have also found that reassuring the patient that you won't hurt him helps get better cooperation, as does showing him the stereo fly early in the testing. The testing then becomes a sort of game.

When any given ward is completed, G. Rex Courtney, O.D., who directs the program, and the student clinician code performance and visual ability according to an adaptive behavior scale of the American Association of Mental Deficiency. The next step is to review each patient's record with the "team leaders" on the ward and to decide who would benefit from spectacles, considering the tasks they must perform and which patients would wear them if prescribed. Any suspected pathology is also brought to the attention of the team leaders for referral to the ophthalmology clinic.

Since I am interested in pathology, I have spent most afternoons in the ophthalmology clinic assisting and observing. I will have seen approximately 350 patients here, in addition to the 175 to 200 patients I have seen in the mornings on my own. Many interesting cases come into the ophthalmology clinic, such as an optic nerve severed by a bullet, many glaucomas, cataracts, trauma of all kinds, burns, foreign bodies, retinal detachments, retinitis pigmentosa, Sjorgen's syndrome, enucleations, and a marked hypertelorism.

I have also been able to observe operations and have seen two muscle resect-recess operations, a cataract extraction, a trabeculectomy, and a two-hour corneal transplant. I have been given the complete cooperation and help of Florence Moore, M.D., staff ophthalmologist, and the entire staff. For anyone interested in pathology, this clinic rotation offers just about anything you want to see. Also, student clinicians are

treated with respect by everyone at the Hospital.

Dr. Courtney makes his private office available for the clinician to observe and help if his time permits. He also performs ERG's in his office at the hospital, so for someone interested in the electrophysiology of the eye, there is an opportunity to pursue that field.

The stay is in all ways valuable — educationally, experientially, and socially.

MSO Auxiliary Awards Two Scholarships

L. to r.: Mrs. Richard Peppe, Women's Auxilliary; Dr. Hyman Kamens, Dean of Administration, MCO; Mrs. Alfred Roy, Women's Auxilliary; William Dyke; and Patricia Packard.

The Women's Auxilliary of the Massachusetts Society of Optometrists recently awarded special tuition scholarships to two fourth-year students.

The \$300 scholarships, which will be matched by equal awards from the College, were presented to William Dyke of Boston and Patricia Packard of Pittsfield.

The Auxilliary scholarships are presented annually to two needy fourth-year students in good standing who are residents of Massachusetts and have signified their intent to practice in the Commonwealth.

The Building Fund Kick-Off Dinner

Dr. Foster Namias ('32), guest of honor, Dr. Glen Gulezian ('65), chairman of the Foster Namias Building Fund, and Dr. Carmine Guida ('54), president-elect of the Massachusetts Society of Optometrists (l. to r.), chat during the social hour preceding the banquet.

Dr. Baldwin (center) with four guests from American Optical: (l. to r.) Mr. Henry Burnett, director of trade relations; Mr. Glenn Hastings, president and chief executive officer; Mr. Owen J. Carroll, vice president of sales; and Mr. Edwin Lau, vice president of operations, Optical Products Division.

Helen Namias, almost as active in her support of the College as her husband, is presented a dozen yellow roses by Honey Baldwin, wife of MCO president Dr. William Baldwin; Ruth Kozol, wife of

Dr. Madelyn Dyer ('39), Dr. William Baldwin, MCO president, and Dr. Richard Baker ('32), chairman of the Board of Trustees (l. to r.).

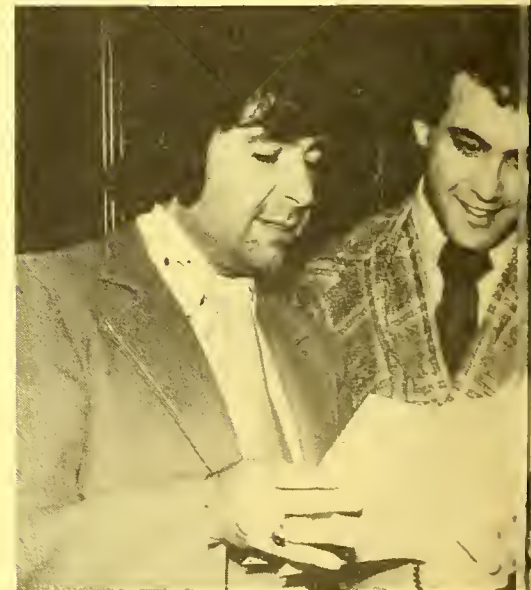

Aaron From, a third-year student and an ordained rabbi, delivers the invocation.

Dr. Glen Gulezian, responsible for much of the planning that went into the evening, served as master of ceremonies for the after-dinner program.

Dr. Otto Hoechstadt, an MCO board member and one of the College's most loyal supporters, called Dr. Namias "the most outstanding optometrist in Boston."

Dr. Glen Gulezian, Dr. Henry Boroyan ('69), president of the Alumni Association, and Mr. Joseph Jefferson, MCO vice president (l. to r.), look over telegrams and letters sent by various dignitaries. Good luck messages were received from Dr. Gilman Bouchard, president of the New England Council of Optometrists; Senator Edward Brooke; Governor Michael Dukakis of Massachusetts; Kevin

anner: The Pictures Tell the Story

registrar Dr. Frank Kozol; and Barbara Kamens, wife of Dr. Hyman Kamens, dean of administration, while Janice Gulezian looks on. (L. to r.: Mrs. Gulezian, Mrs. Namias, Mrs. Kozol, Mrs. Kamens, and Mrs. Baldwin.)

Dr. and Mrs. Namias pose with two personifications of Dr. Namias's supposedly bearish image: the bear bank and a caricature by Boston illustrator Jon McIntosh.

William Dyke, a fourth-year student and Student Government president, presented Dr. Namias with a \$1,500 donation to the Fund on behalf of the student body. Mr. Dyke spoke of the quickness and enthusiasm with which the students voted to contribute to the fund honoring Dr. Namias. The student presentation was visibly the most moving event of the evening for Dr. Namias.

Marty Siegel, a third-year student, entertained guests with the fund-raising campaign's (probably seldom-to-be-heard) theme song: "The Teddy Bears' Picnic."

Harrington, president of the Massachusetts Senate; Senator Edward Kennedy; Thomas McGee, speaker of the Massachusetts House of Representatives; U. S. Representative Thomas P. O'Neill; Dr. Philip Richmond, president of the Massachusetts Society of Optometrists; Mayor Kevin White of Boston; and H. P. Winton, president of the American Optometric Association.

All donors to the Foster Namias Building Fund were individually awarded "share of the bear" stock certificates by Dr. Namias. Here, Dr. Irving Fradkin ('43), a very active and effective member of the Foster Namias Building Fund Committee, receives his certificate.

Student volunteers Lynn Wittman, Janet Wosk, Tim Tolford, Dee Cahan, and Jan Fredo (l. to r.) feed the "bear bank," made by MCO office supervisor and talented ceramist Barbara Austin.

The Namiases and their two daughters pose with the bear bank. L. to r.: June Namias, Mrs. Namias, Dr. Namias, and Barbara Namias Meltzer.

CALENDAR

TEN CONSECUTIVE WEDNESDAYS, JANUARY 7-MARCH 10: Continuing Education Course. Title: General Contact Lens Fitting (Part I of a three-part program on Practical Contact Lenses for the Optometrist). Instructors: Paul White, O.D., associate professor of optometry and director of the Contact Lens Service; Clifford Scott, O.D., assistant clinical professor at MCO and chief of optometry at the Laborer's Vision Clinic; and MCO clinical contact lens staff. Time: 10 a.m. to 3:30 p.m. Place: MCO, 424 Beacon Street, and Contact Lens Clinic, 472 Commonwealth Avenue. Tuition: \$270.

TEN CONSECUTIVE WEDNESDAYS, JANUARY 7-MARCH 10: Continuing Education Course. Title: Part I of

Optometric Assistants course — Clinical Optics. Instructors: Frank Kozol, O.D., associate professor of optometry and registrar at MCO; Mary Scott, O.D., assistant professor of optometry; and Madeline Aurelia, instructor in optometric technicianry. Time: 9 a.m. to 12 noon. Place: MCO, 424 Beacon Street. Tuition: \$150. (Pre-registration for the entire two-part program entitles registrant to reduced tuition fee of \$250.)

TWO CONSECUTIVE WEDNESDAYS, JANUARY 14 AND 21: Continuing Education Course. Title: Slit-Lamp Biomicroscopy. Instructors: William Dell, O.D., clinical instructor and acting chief of staff at MCO's General Clinic, and Anthony Cavallerano,

O.D., clinical instructor. Time: 9 a.m. to 5 p.m. Place: General Clinic, MCO. Tuition: \$108. (Two additional offerings of this course are scheduled: May 19 and 26 and November 10 and 17.)
FOURTEEN CONSECUTIVE THURSDAYS, JANUARY 15-MAY 6: Continuing Education Course. Title: Vision for Teachers. Instructor: Irwin M. Nathanson, O.D., instructor in optometry at MCO and a consultant to the Landmark School and the Cape Ann Collaborative. Guest lecturers: Jerome Rosner, O.D., professor of optometry, coordinator of the pediatric optometry track, and director of specialty clinics at MCO; and Howard M. Coleman, O.D., M.Ed., director of the Children's Perceptual Achievement

ALUMNI NEWS

Annual Alumni Luncheon to be Held During NECO Congress

The usual long lines of hungry alumni and their families and friends will form in front of the various restaurants in the Sheraton-Boston Hotel at noon, Sunday, March 14.

You can avoid this harrying experience and lunch with your classmates and colleagues. The annual MCO Alumni Luncheon will be held at poolside, fifth floor, Sheraton-Boston Hotel, and you

can reserve a table for your own group and family. Doors will be open at 11:30 a.m., and the meal will be served promptly at noon.

Please fill out the reservation slip below and mail it now. Reservations are on a first come, first served basis and tickets will be mailed to you if your reservation is received before March 5. Seating is available for only 200, and experience counsels early reservations.

RESERVATION SLIP

ANNUAL ALUMNI LUNCHEON, MARCH 14, 1976, POOLSIDE,
FIFTH FLOOR, SHERATON-BOSTON HOTEL

Enclosed is my check for \$ _____ for _____ reservations at \$7.50 each.
(Please make your check payable to "MCO Alumni Association.")

ALUMNI NEWS

Meet Your Alumni Officers

Following is a list of your Alumni Association's officers, directors, and committee members. We hope you will have frequent occasion to work with them in the year ahead.

Officers

Henry Boroyan ('69), president
Lester Brackley ('68), vice president
Morris Berman ('30), executive secretary

Directors

Mary Scott ('68)
Fred Rose ('64)
Irving Fradkin ('39)

Roger McCarthy ('63)
John Callinan ('63)
Alan Grossman ('68)

Committees

Alumni Association Building Fund Committee:
Irving Fradkin ('39)
Lester Brackley ('68)

Alumni Journal and Communication:

Morris Berman ('30)
Fred Rose ('64)

Continuing Education:

Alan Grossman ('68)
John Asarkof ('32)
Solomon Slobins ('50)

Student Scholarships and Loans:

Foster Namias ('32)
John Asarkof ('32)
Hymen Kamens ('47)

Functions:

Frank Kozol ('48)
Mary Scott ('68)
Ray Ross ('48)

Parliamentarian and Nominating Committee:

Joseph Craven ('43)
Robert Kraus ('43)

Morris Berman ('30)
Al Glickman ('42)

Holiday Meeting a Success

The fifth annual holiday meeting of the MCO Alumni Association was held the evening of Sunday, December 7, at the Colonial-Hilton Inn in Wakefield, Massachusetts. The meeting was combined with the annual alumni/senior reception and was attended by over 160, including almost 100 per cent of the senior class.

During the business meeting, Dr. Joseph Craven, chairman of the nominating committee, announced the names of two nominees to the post of alumni representative to the College's Board of Trustees. These candidates, Dr. Paul Montminy and Dr. Leo Lemoi (and any others submitted to Dr. Craven before election), will be considered for the post currently held by Dr. Albert Glickman, whose term has expired.

Donald Pasakarnis of the senior class expressed appreciation for the reception given by the Alumni Association, and invited everyone to attend the annual EYEBALL, to be held at the Sheraton-Tara Hotel in Framingham, Massachusetts, Saturday, February 28. A great turnout of students, faculty, administrators, alumni, and friends is expected at this affair, which climaxes the senior class social activities. All inquiries may be sent to S. Monte Levin at MCO.

The following list of alumni includes those who, by paying their current 1975 dues and other contributions, have made it possible for the Alumni Association to function as an organization dedicated to the interests of the Massachusetts College of Optometry. This list is corrected to December 5, 1975. If your name should have been included, please contact Dr. Morris L. Berman, executive secretary, MCO Alumni Association, 424 Beacon St., Boston, MA 02115.

ALUMNI NEWS

Charles S. Bailey, Jr. ('74) and his wife are the parents of a third child, a son, Jason Scott, born September 11. The Baileys are living in Chariton, Iowa.

Newsman *Frank Field*, who graduated from the College in 1960 but has left the practice of optometry to report on science news for NBC Television, has been making news himself recently. A demonstration of a new way to stop a person from choking on food created thousands of requests for instructions. WBZ-TV, the local NBC affiliate, mailed out 20,000 copies of the technique and reprinted it in a newspaper ad promoting their news.

His son, *Storm Field* ('74), also has turned to news, until recently serving as

science editor for National Television News, an independent news service. TVN, sold on a subscription basis to television stations unaffiliated with either of the "big three" networks, has folded, but Storm hopes to continue his career as a television science reporter. Many of you may also have seen him recently in an ad for Petrocelli suits, in which both he and his father were featured.

Matthew Garston ('66), chief of optometry at the U.S. Public Health Service Hospital in Brighton and associate clinical professor at MCO, and Barbara Kauffman were married Sunday, November 30, in Providence, Rhode Island. They are living in Watertown, Massachusetts.
